groundwater in sustainable amounts
rainwater
desalinated water
food
misc. products
pottable (with UV treatment) or non pottable for toilet flushing
water reclamation system
graywater
a household
recyclable
non-compostable waste
non-recyclable
plasma arc gas
rock wool
bricks
metals, to be recycled
excess water field and landscape and from there underground recharging acquifer
compostable waste
feces
urine
going to tanks and used as is as fertilizer
anaerobic digester
slurry (digestate)
biogas
compost making
upgrading to clean methane ("natural gas")
feedstock for chemicals, aluminium, steel.
fertilizing the fields
converting to jet fuel and naphtha
powering all airplanes
